

Rockwell Automation PowerFlex Family

Full Repair & Testing Capabilities for Allen-Bradley Powerflex Drives

We offer full repair and testing capabilities to support your existing Allen-Bradley Powerflex installations—helping you extend equipment life, reduce costs, and minimize unplanned downtime.

- ▶ Fully warranted remanufactured units to restore performance without the cost of new equipment
- ▶ Comprehensive repair services backed by complete functional testing and diagnostics
- ▶ Support for maintaining critical spare part inventories, so you're always prepared
- ▶ A reliable, cost-effective alternative to OEM replacements with no compromise on quality

From troubleshooting and testing to full unit refurbishment, we deliver fast turnaround and expert-level service—because keeping your operations running is our priority.
